Quality and Environmental Policy

COMPATECH aims to establish itself as a qualified company in the field of marketing and managing the production of sheet metal and die-cast aluminum and zinc alloy products according to customer specifications.

COMPATECH's primary mission is customer satisfaction. Being chosen and appreciated by our customers means excelling in:

Reliability, Quality, Price, and Service.

Compatech's policy is to monitor and consider all relevant requirements of interested parties. To achieve this, COMPATECH commits to supporting the following activities:

- Promoting and disseminating the corporate culture of Quality and continuous improvement.
- Achieving customer satisfaction through the provision of quality products and services.
- Improving an integrated Quality and Environmental management system in accordance with the requirements of UNI EN ISO 9001 and UNI EN ISO 14001 standards.

Furthermore, the Company commits to ensuring:

- Compliance with the regulations governing the sector and applicable laws in terms of Product Quality.
- Adherence to applicable legal requirements concerning Health, Safety, and Environment.
- Commitment to protecting the environment, preventing pollution, reducing greenhouse gas emissions, and improving its integrated management system to enhance environmental performance related to its activities.

The Policy is disseminated to all stakeholders to raise awareness at all levels.

An Improvement Plan is issued annually during the Management Review and communicated to the sector managers.

For each year of implementation, maintenance, and development of the integrated management system, the objectives to be achieved are defined in harmony with those expressed in the integrated policy, along with the related means and improvement targets.

Additionally, the management is personally committed to coordinating and controlling the integrated management system to ensure that expected results are achieved, improvements are promoted, process approaches are fostered, and risk-based thinking is encouraged.
